27 January 1970

MEMORANDUM FOR THE RECORD:

SUBJECT: Instalert

1. The Instalert system is a transmitter and 16 receivers with a push button calling device. The calling device is on a grid which permits any one receiver or any combination of receivers to be called simultaneously and receive the same message.

2. The Office of Security purchased the system for emergency use such as a power failure, then pushing the proper grid buttons all 16 people to be notified would receive the message at the same time.

3. Security will test the receivers at each location prior to full acceptance of the system.
